(Manuscript received May 30, 1998)

A part of this paper was presented at the Hakone seminar 97 at  
Toyo University, October 23, 1997.

### Abstract

$F$ -isotopy of links as defined by N.Smythe ([6]) is a concept between isotopy and homotopy of links.

In [4], the self  $\#$ -equivalence of  $F$ -isotopic links was studied.

This paper investigates the self  $\Delta$ -equivalence of  $F$ -isotopic links.
